

## Financial Analyst

### Job Description

Solarmer is seeking a full time **Financial Analyst** with a strong finance background. This position requires the candidate to report directly to the president/CFO, and to actively participate in cross-functional teams as a resource and advisor for financial considerations.

### Job Responsibilities

- Uses knowledge of financial and business concepts, practices and procedures to create financial and valuation reports for various purposes
- Develops and maintains complex financial and business models
- Analyzes and interprets a variety of financial data, and communicates to staff at various levels of the organization
- Recommends the necessary operational changes needed to meet performance expectations within financial and budgetary goals
- Creates annual budgets, re-forecasts and monitors actual expenses to budget

### Qualifications

- Bachelor's degree in Finance and/or Business, with strong analytical skills
- Knowledge of financial analysis, company valuation, budgeting, planning and forecasting
- Demonstrates excellence in oral and written communication
- Strong interpersonal skills, ability to work across all functions
- Advanced proficiency in Excel, Word and PowerPoint

### Company Description

Solarmer is developing transparent, lightweight and flexible plastic solar panels, which are expected to cost a fraction of what silicon solar panels cost. These solar panels will create new markets that are currently not addressable with conventional silicon solar panel technology. The first major applications for this technology will likely be portable digital electronic devices (such as cell phones and PDAs) and smart fabrics (such as tents and solar bags). Building-integrated photovoltaics (BIPV) applications, in the form of power windows, will follow. The company was founded in 2006 to commercialize technology developed at UCLA.
